m

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-21, drawn to a method for cracking disk-like productions.

Group II, claim(s) 22-26, drawn to a device for cracking disk-like productions.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as it can be used to crack a hollow disk and the subcombination II has separate utility such as it can be used to crack a rectangular plate. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together.

Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a

Art Unit: 3724

claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Claim 1 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 1. Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104 Claims that require all the limitations of an allowable linking claim will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier.

Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, the allowable linking claim, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

If the Applicant elects Group I, the Applicant is further required to elect one of the following patentably distinct species: 10/542,259 Art Unit: 3724

Species A, claims 4 and 6, drawn to the rocking motion of the clamping jaw pairs being introduced in a continuously increasing way.

Species B, claims 5 and 7, drawn to the rocking motion of the clamping jaw pairs being introduced in a pulsating way.

Species C, claims 8 and 9, drawn to the rocking motion of the clamping jaw pairs being introduced by a frequency between 0.1-10 Hz.

Species D, claim 12, drawn to the rocking motion of the clamping jaw pairs being generated by moving two clamp jaw pairs toward each other.

Species E, claim 13, drawn to the rocking motion of the clamping jaw pairs being generated by moving one clamp jaw pairs toward the other clamp jaw pairs.

The species are independent or distinct because each of them has different technical features. For example, the rocking motion of clamp jaw pairs in claims 5 and 7 is governed by pulsation; while the rocking motion of clamp jaw pairs in claims 8 and 9 is governed by the frequency of the rocking motion.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

10/542,259 Art Unit: 3724

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

 If the Applicant elects Group II, the Applicant is further required to elect one of the following patentably distinct species:

Species F, claims 22 and 24-26, drawn to a device for cracking disk-like productions wherein clamp jaw pairs are movable.

Species G, claim 23, drawn to a device for cracking disk-like productions wherein one clamp jaw pairs is movable and the other clamp jaw pairs is stationary.

The species are independent or distinct because each of them has different technical features. For example, the rocking motion of clamp jaw pairs in claim 22 is governed by the rocking motion of two clamp jaw pairs; while the rocking motion of clamp jaw pairs in claim 23 is governed by the rocking motion of one clamp jaw pairs.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is

5.

allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

 If the Applicant elects Species F, the Applicant is further required to elect one of the following patentably distinct species:

Species H, drawn to a valve arrangement being a hydraulic proportional valve.

Species I, drawn to a valve arrangement being a servo valve.

Species J, drawn to a valve arrangement being a control valve.

Species K, claim 26, drawn to a valve arrangement being a controllable pressurereducing valve.

- Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phong H. Nguyen whose telephone number is 571-272-4510. The examiner can normally be reached on Mon-Fri.

Application/Control Number: 10/542,259

Art Unit: 3724

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley can be reached on 571-272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
